

Arduino Mega:

D22 → RELAY_CH1_CTRL
D23 → RELAY_CH2_CTRL
D24 → RELAY_CH3_CTRL
D25 → RELAY_CH4_CTRL
+5V → relay VCC
GND → relay GND

Arduino D40 → STG_TRIGGER
Arduino GND → STG_TRIGGER_GND

Single SPDT relay per electrode
OFF:
Electrode connected to Grapevine
ON:
Electrode connected to STG

IMPORTANT:
Only one relay may be ON at a time.
All NO contacts share STG_OUT_BUS.

Relay OFF:
Electrode connected to Grapevine
Relay ON:
Electrode connected to shared STG bus

* Indicates a PWM-capable pin

Relay timing and settling delays
must be determined from:
– relay datasheet
– STG-4002 trigger timing
– oscilloscope validation
